Manage banks

Documentation on how to manage banks

- What is a bank on synthsonline.com?

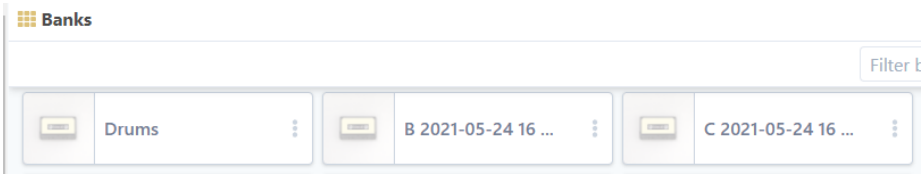

What is a bank on synthsonline.com?

A bank is collection of synth messages stored on synthsonline.com that:

- may contain one or more messages
- can have a custom name
- can be sent to a device

> The bank term is not directly related to the bank term used for synthesizers. However, they can reflect the same contents depending on how they were created

Example of a few banks displayed in the banks sections of a synthesizer:

Example of bank contents:

> Message detail and patch names are only available on selected synthesizers with a **Premium** subscription
