

Refresh midi devices

Refresh midi devices

Sometimes, a device may not be available in the dropdown list:

- it is being used by another program
- device was turned on after loading the page
- etc.

In this case, **Refresh midi devices** button can be used to reload midi devices:

The screenshot shows a 'Manage' section with a gear icon. At the top, a button labeled 'Refresh midi devices' with a circular arrow icon is highlighted with a red border. Below this are three dropdown menus: 'Midi input' (selected: Pulse2), 'Midi output' (selected: Pulse2), and 'Midi channel' (selected: 1). A 'More options >' link is located below the dropdowns. At the bottom, there is a 'Remove device' button with a red 'X' icon, followed by the text 'Remove Waldorf Pulse 2 from your synthesizers list'.

If available, device can be selected in the dropdown list.

In some cases, this will not be enough to correctly refresh the devices list. In the latter case, you can try reloading the page or restarting the browser.
